TECHNICAL SKILLS

Front-End: React, Redux, Apollo, AngularJS, JQuery, Semantic UI, Bootstrap, Bulma, Material UI, React Router, C3
Back-End: MySQL, PostgreSQL, GraphQL, Sequalize, MongoDB, Mongoose, Firebase
Server: NodeJS, Express, Socket.IO
Tools: Git, Mocha, Chai, Enzyme, Postman, Webpack, Babel, Chrome Dev Tools, AWS EC2, AWS RDS

SOFTWARE APPLICATIONS

Meili | *Travel suite for customers that travel to New York and have their trip planned out for them* | Aug 18 - Present
Full Stack Software Engineer
- Designed all of the front-end components using React and Apollo to create a dynamic UI/UX
- Took responsibility as the Product Owner, which entailed arranging both internal and external deadlines as well as meetings in order to ensure all deadlines are met
- Integrated Cheerio to web-scrape data to feed our Machine Learning with past weather models and recommendation algorithms, to provide accurate future predictions based on chance of rain
- Used TDD to test for all aspects of the application, using Chai, Mocha, and Enzyme
- Applied Google and Facebook Authentication with customized greeting page for individual users

Moodvies | *Suggesting movies rated by other users based on moods* | Jul 18 - Sep 18
Full Stack Software Engineer
- Constructed a clean UI/UX experience to display a comprehensive movie profile modal
- Embedded Google Maps to tailor the results based on the user location
- Built unit tests for the database using Mocha and Chai to adhere to TDD

WhereYouAt | *Chat app that shows the central location based on where the users are from* | June 18 - Aug 18
Full Stack Software Engineer
- Used native HTML5 geolocation and Google Maps to find and display mid-points between users
- Built out the entire Mongo database, which hosted all the data about users and messages
- Deployed the application on MLAB and Heroku, setting up a secure connection to trigger geolocation

WORK EXPERIENCE

Alinea - Chicago, IL   2017
Line Cook
- Prepared and created dishes based on seasonality for over 200 customers a night in a 3 Michelin star kitchen, while maintaining organized workflow and cleanliness
- Made all food and preparation follow the SafeServ specifications for DoH inspections which included careful monitoring of temperatures and sanitation standards on an hourly basis
- Demonstrated and developed the ability to work both in a team environment as well as individual basis

EDUCATION

Hack Reactor | New York | Advanced Software Engineering Immersive   2018
International Culinary Center | New York | French Culinary Immersive   2016
College at Hunter College | New York | B.A. - Biology   2014
Universiteit van Amsterdam | Amsterdam | Study Abroad   2013
